Dear Ms. Slocum:

Re: Interim Status Closure Plan for the Burlington Environmental Inc. (BE) facility at
Pier 91 - WAD000812917

This correspondence is in response your letter to the Department of Ecology (Ecology) dated July 6, 1993. Within your letter you requested an extension for the revisions to the interim status closure plan which would incorporate the two plans that BE has submitted to Ecology.

The request for an extension until August 30, 1993 is acceptable with the understanding that the revised plan will incorporate both of the plans into a single interim status closure plan. It was my understanding that this would be the procedure originally and I am unclear why this approach was not used for the initial submittal on October 23, 1992. A revised closure plan, once approved, takes precedence over any earlier submittal. The complete facility must be covered either under the final permitted facility closure plan or one interim status closure plan.

In addition to the extension, BE has requested a meeting to discuss the combination of the two interim status closure plans. A meeting can be arranged if you feel that it is necessary. I think the comments to the interim status closure plan sent to John Stiller on June 14, 1993 are specific enough to cover the issues, but feel free to call if you still think a meeting would be helpful.
